● Florida Mountain Collars
□ Resource Boundary

- (1) Downhole thickness; true width varies depending on drill hole dip; most drill holes are aimed at intersecting the vein structures close to perpendicular therefore true widths are close to downhole widths (approximately 70% conversion ratio)
- (2) Intervals reported are uncapped
- (3) Gold equivalent = $g \text{ Au/t} + (g \text{ Ag/t} \div 77.70)$
